

Advanced Zones Editor:

- Create custom zones like the Spread Map – Zones feature.
- Ability to save the zones under the field in the profile tree.
- Once saved, the zone can be brought in and layered with other data sets (Yield, Soil Types, Imagery, As-applied, other soil nutrients, etc.).
- Utilize Zone Opacity slider to allow layered data sets to be viewed.
- Editing tools to modify selected zones. Save edited zones back to field.

Zones	Label	Acres
<input type="checkbox"/>	Low	28.75
<input type="checkbox"/>	Ave	25.12
<input checked="" type="checkbox"/>	High	23.74

Advanced Zones Editor:

- Rename zone IDs.
- Use zones in the Target Sample Tab to set sample points for sampling / zone mgt tasks.
