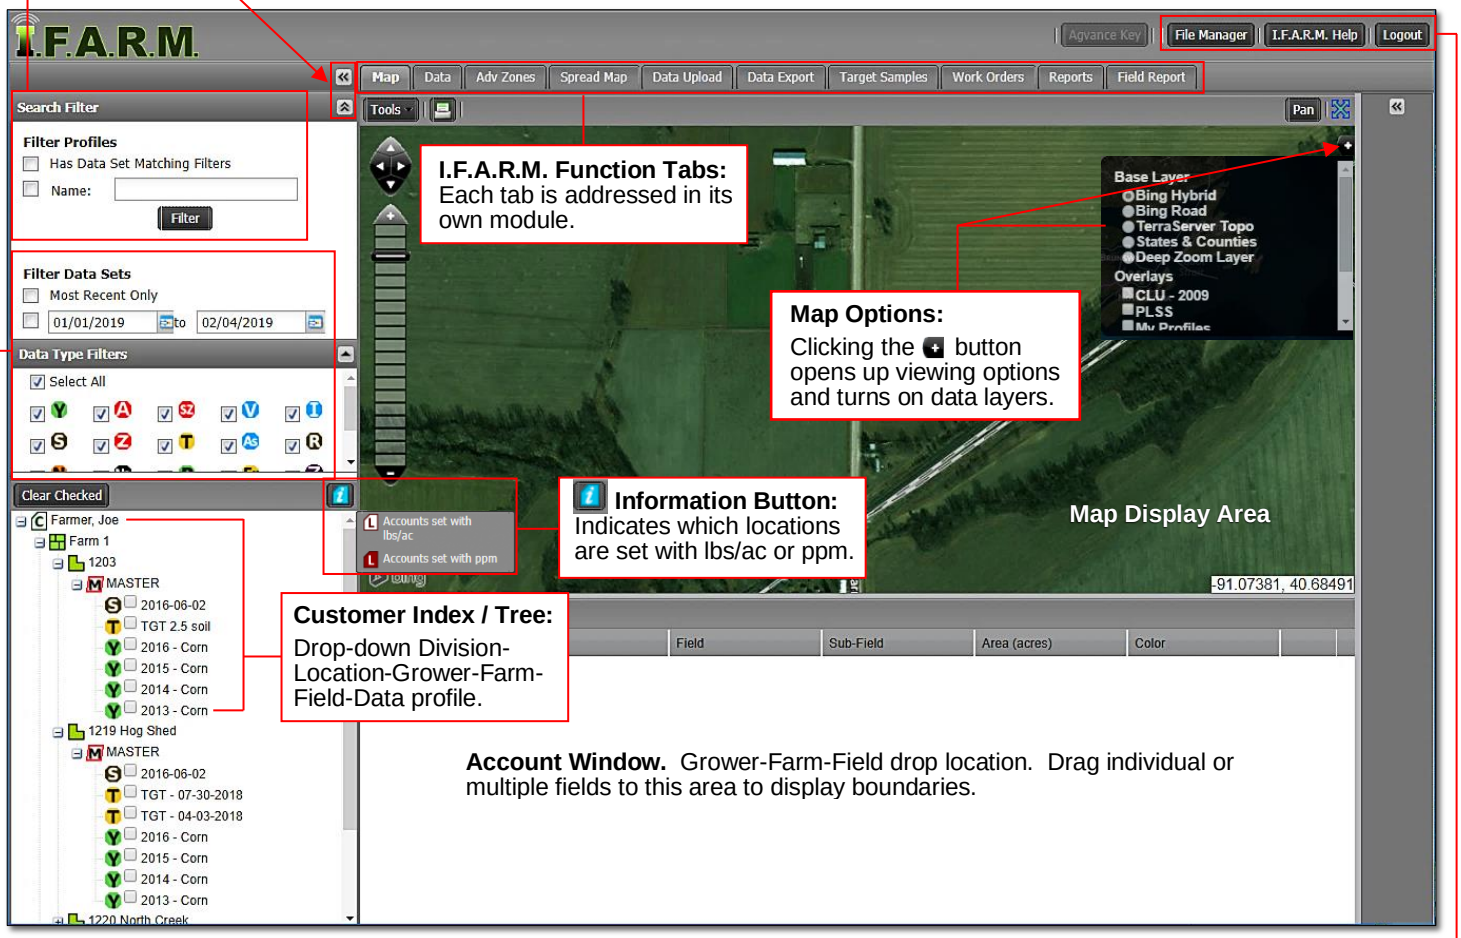
# I.F.A.R.M. Basics

### Main Interface Description

**Filter Data Sets:** Fast way to filter data. Turn on / off attributes to filter visible data in profile. Show most recent or all data under profile. Search by date range. Click **Filter** or **Has Data Set Matching Filters**.

**Filter Profiles:** Helps locate only those customers that have a certain type of attribute selected (i.e. yield / soil / applications). Can search by name. Apply **Filter** to see results.

**Reduction Tabs:** Collapse Search Filter and Customer Index windows.



**File Manager:** Location where all activity is stored (i.e. reports, exports, recommendations, etc.). Offers search filters to locate reports, spreader files, etc.

**I.F.A.R.M. Help:** Opens a web link that offers tutorials on program functions.

**Logout:** Exits the I.F.A.R.M. program.
